

Technical Data

FORMULA 14 **NON-SILICONE RELEASE AGENT**

FORMULA 14 is a non-silicone based release agent, specially developed for the mould release of thermoplastics which require post mould process treatment (painting, printing, thermo-welding, etc).

The active product is based on an edible food oil and may be used for the mould release of toys etc.

FEATURES

- Has excellent lubricating properties with a temperature resistance of up to 200°C
- Produces a high durability film, giving low migration during use
- Increases the mould tool working life
- Increases the slip and release properties of mould tool

APPLICATIONS

- Formula 14 is especially recommended for the de-moulding of plastics (LDPE, HDPE, PP, PVC, PS, POM, PA) which have to be treated after de-moulding
- Formula 14 can be used for the release of products where a food quality product is needed

DIRECTIONS

- Apply under working conditions on a clean and degreased mould

TECHNICAL DATA

Density @ 20°C	:	0.669
Colour	:	Light Brown
Temperature Resistance	:	200°C
Packaging	:	400ml

STORAGE

The product may be stored at normal ambient temperatures and has a shelf life of not less than 12 months with correct storage. Aerosols should always be stored below 50°C, away from direct heat and naked flame.

HEALTH AND SAFETY

Health and Safety sheet available separately.
