

ROTARY OVEN GREASE ROTO TECH

Product Overview

Non-carbonising semi fluid grease designed to for operation at high temperatures particularly where access may be difficult.

Suited for economical application to rotary oven bearings in bakeries or any other bearings on chains operating at slow speeds or under heavy loads.

Typical Applications

- **Rotary Ovens**
- **Chains**
- **Bearings**

Features and Benefits

- Long lasting at high temps
- High load properties
- Low ash deposits
- Does not fling off
- Resists vibration
- Resists shock loads

Directions for Storage and Use

Product is to be stored in a clean, dry, storage area in its original sealed packaging.

Shelf Life (unopened) – 3 years approx*

*Some bleeding may occur, thorough mixing will homogenise the mixture to its original state.

Product can be applied by brush, applicator or automatic lubrication system.

Do not mix with other lubricants if compatibility is not known, for best results purge system of other lubricants. Apply to clean, dry parts only.

The data sheet is based on personal knowledge and experience and is given as a guideline to its possible uses. It does not take into account variables or conditions out of our control that can affect our product in any way. It is the users' sole responsibility to ensure that the product is suitable for the purpose for which it is being used and this data does not in any way form a warranty. If you are unsure of its suitability please contact us and we will be happy to discuss your needs and supply a sample for testing if required. New Tech Lubes Ltd is committed to supplying the best products and may therefore change the information in this specification at any time.

Available Sizes
400g Cartridge
2kg Tin

Physical Characteristics	
Appearance	Black semi fluid grease
Temperature range	0°C - 450°C (Continuous at 180°C)
Solids	Graphite and MoS2
Pour point ASTM D97	6°C
Flash point (Open Cup)	>250°C
Four ball weld load	225 Kg
Viscosity 40°C	19000 cSt

Available Grades
