PROTEAN

TECHNICAL DATA SHEET

PROTEAN ULTIMA 2 TF6312

Description

PROTEAN Ultima 2 is a NSF: H1 registered multi-purpose grease for use within Food & Beverage, Packaging, Pharmaceutical and other cleanroom environments.

A high performing, true all-round grease enhanced with PTFE, extreme pressure and anti-wear additives, PROTEAN Ultima 2 performs well in wet and saturated environments; under both high load and high temperatures and ideal for bearings, chains and gears. A must-have for those wishing to streamline their range of food grade lubricants!

Benefits & Features

- · The go-to grease for most food safe applications
- · Heavy duty, high load, PTFE enhanced lubricant, offering excellent adhesion and performance
- · Exceptional water resistance provides long lasting lubrication and protection against corrosion
- Provides long term lubrication at high temperatures, extends relubrication intervals
- Excellent anti-wear performance reduces friction and extends component life

Directions for Use

PROTEAN Ultima 2 can be applied manually, by grease gun, auto lubrication system or by other methods suitable for an NLGI No. 2 grease

As with all greases used for the first time, check compatibility with the previously applied grease and if necessary, purge bearings prior to application. Likewise, as a general rule, take care not to overlubricate and apply the quantity of grease recommended by the bearing manufacturer.

Product is to be stored in a clean, dry, storage area in its original sealed packaging.

Shelf Life: 36 months* (unopened)

*Some bleeding may occur when not in use for extended periods of time, however thorough mixing will return the mixture to its original state.

Technical Data

Category: H1 – Lubricants with incidental contact

NSF Registration No: 160999

Allergens: Does not contain allergens, genetically modified

ingredients, nut oil or derivatives.

Appearance: Cream / Beige grease

NLGI Classification: 2

Thickener: Aluminium complex

Drop Point (IP132): >250°C dN factor: 400,000

Base Oil: Synthetic (hydrophobic)

Base Oil Viscosity:

Solid lubricant: White lubricating solids and PTFE

Shell 4 Ball Weld Load (IP239): 700kg

Copper Corrosion (IP112):

Water washout (ASTM D1264) @38°C: <1% max Dynamic Corrosion Resistance: 0:0

Relative Density:

Operating Temperature Range: -40°C to 240°C (PTFE to 350°C in dry film)

Pack Sizes: 1 x 12.5kg
