TECHNICAL DATA SHEET

PROTEAN GEAR 320 TF9720

Description

PROTEAN Gear 320 is a H1 registered semi-synthetic gear oil, suitable for the lubrication of gearboxes and reduction units, and approved for use within food and beverage processing environments. PROTEAN Gear 320 can also be used as a chain lubricant where temperatures do not exceed 140°C (continuous) or 160°C (intermittent).

Benefits & Features

- Extremely good oxidation stability which extends lubricant life
- Unaffected by water demulsibility ensures total separation of water from oil
- · Adhesive additives coat gears and provide anti-wear protection at start-up
- · Semi-synthetic oil with high Viscosity Index ensures reduced viscosity change with temperature increase

For chain applications:

- · Penetrates to the links and pins reducing wear and extending chain life
- · Adhesive additives ensure non-drip, no fling thus providing lasting lubrication
- Excellent adhesive characteristics ensures a high degree of water resistance and protects parts from corrosion even in the
- presence of alkali materials commonly associated with the food industry
- Extremely wide temperature range ensures maximum application versatility

Directions for Use

For gearboxes and reduction units: Ensure that the gearbox manufacturers' lubricant rating corresponds to using the ISO grade recommended. For optimum performance, drain gearbox of previous lubricant. **For drive and conveyor chains:** Apply sparingly by brush or oil can as required. Can also be applied automatically using a central drip feed system.
